SUMMARY

Skilled Full Stack Web Developer with experience in JavaScript, React.js, Node.js, and Express.js. Proficient in front-end and back-end web development.

EXPERIENCE

PLSP Movers, Remote Web Developer

Mar 2023 – Present

Developed a responsive website(plspmovers.com) for the company:

- A responsive, user-friendly frontend using **ReactJS** and **TailwindCSS**
- Integrated **EmailJS** for real-time contact form submissions without needing a backend.
- Built admin dashboard for company's manager to track their shipments, using **MERN**.

Jubilant Tech, Web Developer, Full Time

Oct 2021 – Jan 2022

Developed a photo-editing website for a client:

- Built a fully interactive photo editing web app using **Fabric.js** and **Vanilla JavaScript**, enabling users to upload images and perform advanced canvas manipulations such as resizing, rotating, dragging, cropping, flipping, grouping/ungrouping, and applying filters. Implemented real-time editing with support for multiple objects like text, shapes, and icons—all managed through an intuitive and UI.
- Developed editing tools including **color pickers, layer control, text styling, zooming, and export functionality**, allowing users to fully customize their designs and download images.
- Structured the project using modular Object-Oriented Programming for scalability and easy feature expansion.

Freelance, Full Stack Web Developer

2022 – Present

Resumify(*https://resumifyyy.vercel.app/*) – AI based Resume Generator *:*

- Allows users to generate resume using their profiles.
- Allows users to generate tailored resume for a specific job description using AI.
- 3 templates available.

Ecomerce Store:

- Developed a fully functional e-commerce website using MERN stack, including React.js for front-end and Node.js withExpress.js for the back end, enhancing user engagement.
- Implemented Redux.js for state management, improving application performance and user experience.

Glo-School(glo-school.org) **-** A features rich website currently under development using **Wordpress** where users can:

- Create and sell courses, and offer downloadable courses
- Join relevant discussions in Forums
- Join live chatrooms and livestreams
- Sell products and services, managing their own stores
- Read blogs that are published by admin

Students Assignments/Projects:

- Assisted foreign/local university students with academic projects by developing functional solutions in web development.
- Delivered custom frontend/backend applications, coding assignments, and mini projects using React.js, Node.js, MongoDB, JavaScript, and more.

Web Development Instructor:

- Taught **Web Development Concepts** to beginner and intermediate, local and foreign students through personalized one-on-one sessions on **Preply**.
- Delivering web development training sessions for students, covering **HTML**, **CSS**, **JavaScript**, **React.js**, **NodeJs**, **MongoDB** and **Git workflows,** at **ACM UMT**.

Hackathons:

- **Runners-up** at Softcom'25, GIKI. Developed backend/frontend for an events management site, using **MERN**.
